SUPPLEMENTARY INFORMATION: The BNSF Railway Company requested a temporary deviation from the operating schedule on the the Galveston Causeway Railroad Vertical Lift Bridge across the Gulf Intracoastal Waterway, mile 357.2 west of Harvey Locks, at Galveston, Galveston County, Texas.

The bridge has a vertical clearance of 8 feet above mean high water, elevation 3.0 feet NAVD88, in the closed-to-navigation position and 73 feet above mean high water in the open-to-navigation position. In accordance with 33 CFR 117.5, the draw shall open on signal for the passage of vessels.

This temporary deviation allows the vertical lift bridge

to remain closed to navigation from 8 a.m. until 11 a.m. and from 12:30 p.m. to 3:30 p.m. on Thursday, February 27, 2014. During this time, the bridge owner will troubleshoot the bridge to attempt to correct a popping noise when trains cross the bridge.

Navigation at the site of the bridge consists mainly of tows with barges and some recreational pleasure craft. Due to prior experience, as well as coordination with waterway users, it has been determined that this closure will not have a significant effect on these vessels. No alternate routes are available.

In accordance with 33 CFR 117.35, the draw bridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation.

This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: January 27, 2014.
